

*Best Solutions from a single source for  
Heat Treating • Coating • Plating • Sorting*

# AG18

**AG18** was developed to address agricultural and industrial OEM requirements for corrosion resistance, durability, and unique drive torque requirements. **AG18** meets the requirements of John Deere's JDM F15 A2C specification.

**AG18** features include the following:

### Characteristics

8 Microns minimum zinc  
clear/silver appearance  
hexavalent chrome free

### Performance

120 hours to White Corrosion\*  
500 hours to Red Rust\*  
.18 mean value coefficient of friction

\*Salt Spray values are "as processed"

J&M Plating operates a 210,000 sq. ft. state of the art heat treating, zinc electroplating, dip-spin coating, and sorting facility offering "one stop shopping" to the fastener and small stamping marketplaces. J&M is certified to the ISO9001:2015 quality standard, and our heat treating and plating laboratories are ISO/IEC 17025:2005 accredited in the area of testing-mechanical.

For more information or a quotation on the **AG18** finish or any other heat treating, zinc electroplating, dip-spin coating, or sorting requirements, please contact:
