

Best Solutions from a single source for
Heat Treating • Coating • Plating • Sorting

ENVIRO-BLACK™

The **ENVIRO-BLACK™** hexavalent chrome free finish was developed as a replacement for conventional black chromates containing hexavalent chromium; with the added benefit of meeting the performance of most organic and paint based black coatings.

ENVIRO-BLACK™ features include the following:

Characteristics

- .0003 Minimum zinc required
- **Black** appearance

Performance

- 120 hours to White Corrosion
- 500 hours to Red Rust

*For applications that require *post plating lubricants*, please contact the J&M Plating sales representative listed below.

J&M Plating is a 210,000 sq. ft. state of the art heat treating, zinc electroplating, dip-spin coating, and sorting facility offering “one stop shopping” to the fastener and small stamping marketplaces. J&M is certified to the ISO9001:2015 quality standard and their heat treating and plating laboratories are ISO/IEC 17025 2005 accredited in the area of testing-mechanical.

J&M Plating would like to extend an open invitation for all of our current and prospective customers to visit our facility.

For more information or a quotation on **ENVIRO-BLACK™** or any other heat treating, plating, or sorting requirements, please contact:
